

JONATHAN NARGI

Waynesboro, VA · (540) 471-1688 · nargijonathan@gmail.com · github.com/Zoxics · jnargi.dev

EDUCATION

A.S. Computer Science — *Blue Ridge Community College* Aug 2023 – Expected May 2025

- Coursework: Data Structures & Algorithms (Java), Physics II, Engineering, Systems Analysis
- STEM Club member — participated in tech workshops and peer-led problem-solving projects

High School Diploma — Honors — *Virginia Virtual Academy* Aug 2019 – May 2023

- Completed 5 Advanced Placement courses across STEM and humanities disciplines

PROJECTS

Windows Remote Control & Deployment System · *C#, WPF, REST API, Kestrel, HTTP*

- Built a multi-component system for remote Windows management: a WPF dashboard frontend communicating with a self-hosted Kestrel REST API backend
- Implemented remote command execution, process control, and deployment automation — designed to replace manual RDP workflows
- Diagnosed and resolved runtime bugs including URI parsing errors and Kestrel double-binding configuration conflicts across network interfaces

Discord Bot with Local LLM Integration · *Python, discord.py, SQLite, Ollama*

- Designed and built a modular Discord bot using a cog-based architecture for maintainability and feature isolation
- Integrated Ollama to run local LLM inference, enabling AI-driven responses without external API dependencies
- Persisted user data with SQLite and packaged the entire application as a standalone Windows executable for frictionless deployment

Personal Portfolio Site · *TypeScript, React, Tailwind CSS*

- Built a fully responsive portfolio site with markdown-driven content management, eliminating manual HTML edits for new posts
- Implemented dynamic content generation and component-based architecture for long-term maintainability

EXPERIENCE

Expeditor / Kitchen Manager — *Stable Craft Brewing* Oct 2020 – Present

- Managed ticket flow and plating operations during high-volume service, coordinating between kitchen and front-of-house teams under tight time constraints
- Trained and supervised staff on health standards, station setup, and service tempo — responsible for consistent output during peak hours
- Maintained composure and operational accuracy in a fast-paced, high-pressure environment across 5+ years

TECHNICAL SKILLS

Languages: Python, Java (fluent) · C, JavaScript, TypeScript (intermediate)

Frameworks & Tools: React, Tailwind CSS, Kestrel, discord.py, Ollama, SQLite, WPF

Cloud & DevOps: AWS (Certified Cloud Practitioner) · Git, GitHub

Languages (spoken): Latin, German, Spanish (basic)
